

# Do you still not know how to theme your island or your Animal Crossing New Horizon's house ?

Animal Crossing has been around since March 20th 2020 and since the new terraforming tool is a new option in Animal Crossing New Horizons, people are still confused how to get their island looking good, in order to get a 5-star rating. It can be hard to theme an island if you don't have all the materials and resources you need but, you can do it without the resources.

Even if you don't have the resources, you can terraform the land and plan out exactly what you want. Think about your favourite movie or your favourite TV show. If you like The Simpsons, you can theme your house as the Simpson's house. It may take long to get the right colour of every single object but, you can always have things as placeholders. I've seen a couple of island tours online and there were themed houses of John Wick, Casablanca or just a solid colour such as Pink theme (everything is pink).

Here are some recent examples I've seen for themes:

- Chinese plaza
- horror
- bamboo/zen style
- Pokemon go
- Stardew valley layout
- Cruise ship theme

You can create a zoo with the animals that you can't actually have as real pets. There are snapping turtles, dinosaur throwback screen, bird cage with a bird in it and any of your fishes to pull it all together.

Easter was a long day for many Animal Crossing users but, a good idea for an island would be all the easter stuff you have collected. Craft everything there ever was and decorate a tiny island to always be reminded of it.

or try that cool forced perspective where you stand at the top of a cliff and when you look down, whatever is below makes it seem like it is further away.

## No theme, no problem!

Say if you can't think of a theme, think about the way you want to play your game. Do you like accessibility? Do you like organization ? Do you like minimal or neatly placed? Maybe as an organized type person, you would want to make an island full of shells but, make custom designed squares to organize them to know exactly where they are, if you ever need them. As a person that like accessibility, the most important things to you are in front or having just

enough space between everything so your character doesn't have to squish between objects (since you can see their struggle as you play the game).

There are other ways you can change up your house, some people just throw all their turnips in one room or all their random objects in the room as a junk room, since they are waiting for their ultimate theme.

## **Some Tips**

If you are more of an organized, visual kind of person, [www.villagerdb.com](http://www.villagerdb.com) is a website for you. It is a fan based website, mostly to make wish lists of your favourite items to organize them and know what you want once you get them. Another website that is very useful and similar is [www.nookazon.com](http://www.nookazon.com). Although, it is a trade and sell kind of website you can still organize stuff from there as well. With Nookazon, planning what you want and actually buying from other people with Nintendo Switch online could be another easy way to get what you want.
